

SOLUTION BRIEF (ALERT LOGIC)

Alert Logic Managed Detection and Response

No Level of Investment Prevents or Blocks 100% of Attacks

As the industry's first managed detection and response (MDR) provider, our purpose-built technology and team of security experts work closely with each customer to understand your unique needs and business context, empowering you to identify and resolve whatever threats, breaches or gaps may come.

Intelligence Driven By Data and Humans

Security experts in our global Security Operations Center (SOC) leverage industry data, continuous research from our threat intelligence team, and machine-learning from aggregated data of thousands of customers. This knowledge provides you vital context about your risk of exposure and exploitation that leads to the most appropriate event response.

Security Insight Always at Your Fingertips

Our platform delivers real-time reporting, giving you access to information on risk, vulnerabilities, remediation activities, configuration exposures, and compliance status. With this intelligence, you can focus on a prioritized order of threats that need further triage, drill down into threats to act on or mitigate exposure, and provide intuitive risk visualization.

Alert Logic Console Dashboard

Real Security Experts Assigned to Your Account

People are a critical component of Fortra's Alert Logic MDR solution. Each customer is assigned a broad range of security, technology, and customer success professionals who provide a personalized level of service that considers the unique context of your organization.

Fortra.com Page 1

Scalable MDR Platform

Our proprietary platform analyzes network traffic and more than 140 billion log messages each day. This provides coverage across your entire attack surface and brings together asset visibility and security analytics for cloud, networks, applications, and endpoints in cloud, on-premises, and hybrid environments.

Tailored Protection to Each Asset in Your Estate

With Alert Logic MDR, you decide on the most appropriate level of protection for each of your assets. This ensures you achieve your desired security outcome with the right coverage at the best possible cost for your business.
